

Discrete Mathematics
Volume 195, Numbers 1–3, 28 January 1999

Contents

Contributions

<i>B.D. Acharya and P. Gupta</i> On point-set domination in graphs IV: Separable graphs with unique minimum psd-sets	1
<i>A.M. Assaf and R. Wei</i> Modified group divisible designs with block size 4 and $\lambda = 1$	15
<i>M.D. Atkinson</i> Restricted permutations	27
<i>C. Balbuena</i> Extraconnectivity of s -geodetic digraphs and graphs	39
<i>L.B. Beasley, S.D. Monson and N.J. Pullman</i> Linear operators that strongly preserve graphical properties of matrices — II	53
<i>B. Bollobás, O. Riordan, Z. Ryjáček, A. Saito and R.H. Schelp</i> Closure and Hamiltonian-connectivity of claw-free graphs	67
<i>B. Chen and S. Zhou</i> Domination number and neighbourhood conditions	81
<i>D. de Werra and A. Hertz</i> On perfectness of sums of graphs	93
<i>M. Dror, G. Finke, S. Gravier and W. Kubiak</i> On the complexity of a restricted list-coloring problem	103
<i>P.C. Fishburn and W.T. Trotter</i> Split semiorders	111
<i>W. Gao</i> On the number of subsequences with given sum	127
<i>T. Helleseeth, C. Rong and K. Yang</i> New infinite families of 3-designs from preparata codes over \mathbb{Z}_4	139
<i>S.R. Kingan</i> Intersections of circuits and cocircuits in binary matroids	157
<i>H. Martini and P. Soltan</i> On convex partitions of polygonal regions	167
<i>A. Muthusamy and P. Paulraja</i> Path factorizations of complete multipartite graphs	181
<i>B. Oporowski</i> Minor-equivalence for infinite graphs	203

Notes

<i>A.A. Ageev</i> Every circle graph of girth at least 5 is 3-colourable	229
<i>A.C. Atkins, G.N. Sarkozy and S.M. Selkow</i> Counting irregular multigraphs	235
<i>D.W. Barnette and S. Gillett</i> Paths and circuits in partially directed graphs	239
<i>M. Conder</i> Explicit definition of the binary reflected Gray codes	245
<i>P.E. Haxell</i> Packing and covering triangles in graphs	251
<i>J.-S. Li and Z.-X. Song</i> On the potentially P_k -graphic sequences	255
<i>D. Lou</i> A local independence number condition for n -extendable graphs	263
<i>Y. Miao and S. Kageyama</i> Two classes of q -ary codes based on group divisible association schemes	269
<i>J. Qian</i> On the upper bound of the diameter of interchange graphs	277
<i>M. Sutton, M. Miller, J. Ryan and Slamin</i> Connected graphs which are not mod sum graphs	287
<i>Z. Zhang, B. Xu, Y. Li and L. Liu</i> A note on the lower bounds of signed domination number of a graph	295
Author index to volume 195	299
